

Basic Techniques in Mammalian Tissue Culture Systems

**June 13-15,
9 a.m. – 5 p.m.
Biology Annex
Room 106**

Supported by NIH grant #R25GM061222

Since cultured mammalian cells are used extensively in research studies, this three-day workshop is designed to familiarize undergraduate and graduate students in the use of tissue culture systems for research purposes. **Dr. Amanda Ashley**, NMSU Assistant Professor of Biochemistry, aims to provide teaching and training of generally used practices in tissue culture systems and to convey general safety requirements and risks for working in a BSL2 laboratory.
